

Kevin's Puzzle of the Week

Hard Work

Five workers (including Coral and Idaho) all have been assigned tasks to complete, each in a different location. Each of them will start at a different hour between 1:00pm and 5:00pm inclusive. One task is planting turnips.

Each task takes a different number of hours to complete. No one has more than five hours work, and no two people will complete their duties at the same time.

The first task finished will be yodeling practice, and the last will be listing duties. The third one completed will be cutting tape.

Sawing logs will not take place in the showroom.

One person works in a location which starts with the same letter as their first name, and another works in a location beginning with the same letter as their last name.

The last task will be completed at 9:00pm.

Roger (whose last name is neither Grant nor Thompson) begins work at the factory at 3:00pm.

Olive (whose last name isn't Bardin or Forrester) begins yodeling practice at 2:00pm.

Lewis Heffley will finish up at 4:00pm. No one will finish at 7:00pm.

The worker with the last name of Grant will begin their duties at the idyll at 4:00pm.

The task at the rectory will be finished first. The task at the garden will be finished last.

Start Time	Finish Time	First Name	Last Name	Task	Location
1:00					
2:00					
3:00					
4:00					
5:00
