

Kevin's Puzzle of the Week

City Streets

Just follow the directions, and you're certain to find your destination.

Drive one block, then take a left. Continue for a block, then take another left. After two blocks, hang a right. In one more block, take a left and continue for an additional block.

Go right, then continue on for three blocks. Take another right and go three more blocks. Hang a right, then go a single block and make another right. After two blocks, repeat the last step, but taking lefts instead of the two rights.

In another two blocks, make a right, then drive another block. From there, go right, travel three blocks, and take a left. Drive forward, and take the third left from that point, driving another two blocks. Take a right, and then take the next right available. Travel three blocks before taking a left and continuing on for five blocks.

At this point, you will need to take two lefts in a row, followed by the second right. Continue straight for three blocks, then take a left, followed by another a block later. After three blocks, hang a right and travel for two blocks, then make a u-turn and take your next left.

Travel three blocks, then take a left and travel for three more. Finally, take one more left and head straight for three blocks to reach your destination.
