

Kevin's Puzzle of the Week

Babysitting

Over the course of five evenings, five babysitters each cared for a different child, one per day. Each child was doing a different activity. Can you figure out which babysitters, kids, and activities happened on each day?

- In some order, the children were, Asher, Joseph, the child who was drawing pictures, the child who was eating dinner, and the child being watched by Aldwyn.
- Nevaeh was being watched one day after the child who was snoring, and one day before the child being watched by Chris.
- The child who was drawing pictures was babysat some time after Yoshi, but not on day 5.
- Daniel worked as a babysitter on the first day, and his charge was not collecting rocks.
- Eloise had an easy evening, since her charge was snoring the whole time.
- Joseph was babysat sometime after the child who was using the tablet.
- Briony is always Octavia's babysitter.
